## How long does a baofeng battery last

The Baofeng UV-5R is an economical Dual Band UHF/VHF Amateur Radio that's extremely compact. With 128 channel capacity and up to 12 hours of battery life, the UV-5R is a good choice for ham radio operators who need mobility at low cost. What is the range of Baofeng UV-5R? Your Baofeng UV-5R is a transceiver; that is, both a transmitter and a receiver. With a full battery and in full power mode, it will give you a range of about 10-20 km depending on obstacles. Maybe even more, depending on propagation. How can you tell a fake BaoFeng? A genuine BF-F8HP will be clearly advertised on the packaging. A genuine BF-F8HP user manual will actually refer to the radio as a "BF-F8HP" and will not be generic. How long does it take to charge a BaoFeng? Takes about 3 hours to charge and lasts around 12 hours in receive squelched mode. Takes about 4 complete cycles to fully develop the capacity of the battery so run it completely flat before recharging for the first few cycles. Do I need a Licence for BaoFeng UV-5R? Technically, you need a license for all those services. However, CB, MURS, FRS are all "license by rule." Meaning, you are granted a license as long as you follow the rules. You don't have to submit an application or use a call sign for those services. Is BaoFeng good? The BaoFeng BF-F8HP wins our Top Pick Award as the best radio for properly licensed ham radio operators. It can only be used legally by those who have a valid Technician ham radio license or higher. It has an amazing amount of settings, its battery lasts quite a while, and it has an unbeatable range. How do I change the frequency on my Baofeng? How to manually program the Baofeng UV-5R from the keypad Press [VFO/MR] and enter Frequency Mode. Press [A/B] and choose the A Side (upper display). Press [BAND] for the frequency band. Disables TDR (Dual Watch/Dual Standby). Enter the frequency. optional - Enter the transmit CTCSS/DCS code. Increase up time on your Baofeng UV-5R with this high capacity 3800mAh battery! Genuine Baofeng Lithium-Ion battery pack Model BL-5L 3800mAh 7.4V compatible with the Baofeng UV-5R Battery Charger Drop-In Tray Model PC-001 Works with Baofeng UV-5R Dual Band Amateur Radios Great experience review by KARL on 3/2/2019 Excellent item exactly as advertised, fast shipping. Great Batteries review by Ray on 12/8/2018 The battery which was a free battery with the purchase of two batteries was a great buy. The battery came fully charged and fit perfectly in the radio, the same as the two that I purchased. The 3800 mAh batteries last much longer than the lower mAh battery. All three batteries came in one package and arrived in less than a week. They are the original batteries and not aftermarket. Great service from BuyTwoWayRadio. Great Batteries review by Ray on 12/8/2018 I have purchased two 3800 mAh batteries for my UV-5R. The batteries came fully charged and ready to use and fit perfectly in my radio. The service from BuyTwoWayRadio is excellent and they arrived in a few days, less than a week. real Baofeng equipment! review by Joe L. on 6/5/2016 got a bunch of off-brand batteries from different suppliers; these guys have the real thing! Great review by bob on 4/3/2016 lasts much longer than standard Pretty decent battery review by G.B. on 2/5/2016 As stated I like the way this extended battery feels and looks on the radio. I'm retired LEO so I think thats why I like the bigger battery, reminds me of my old Motorola! The Battery is a great add-on for UV-5R and BF-F8+ radios. review by Tim, (W0TES) on 12/8/2015 I have purchased high capacity 3800 mAh batteries for all four of my Baofeng radios. Their fit, to the radio case, as well as sitting in the battery charger, is perfect. I have accidentally left a radio on for 5-6 days, with power to spare. I recommend adding one of these to every handy-talky in the house and bug-out-bag. Add a solar charger and you can deploy off-grid indefinitely. best quality at a surprisingly low price review by kpw70445 on 9/24/2015 Very good quality at a surprising price. Very ruggedly built! will buy again. review by ricmarkn on 8/20/2015 As back up to standard battery. Last a long time and does a good job. Wonderful Life Expectancy review by Steve flies kites on 11/25/2014 This battery is very useful. My previous battery had come to the end of its working life, and would only give me about 20 minutes on a charge. This one on the other hand has lasted me months on a single charge! I thought it would have died long ago. I've been thoroughly impressed. Great deal - Buy multiple at this price review by Dan M on 9/4/2014 This site offer the best price and you know you are getting the real deal and not a knock off. Good battery life review by Cluuck on 7/26/2014 Good battery life and assistance from Buy Two Radios Great addition review by Jeff on 6/18/2014 This battery does not add depth to the radio. The additional space is added below the radio. Even with this battery the radio is compact. The 3800 mah capacity will more than double the time you can use your UV-5R. Battery Compatibility review by Dave at Orion on 5/1/2014 The Baofeng BL-5L battery does not fit the Baofeng UV-5R+ radio. The mechanical interface is different. It can be made to fit by cutting away the plastic moulding on the battery case. The plastic is hard - it takes a Dremel tool or similar. Best, Dave Edmonds Wondering how and where to recycle old batteries? There isn't necessarily an easy answer to this question, but it's definitely one worth exploring. Learn more about which batteries you can recycle and which ones are best tossed in the garbage can.Battery Materials and Recycling FactsBatteries used to be made from extremely harmful materials, including mercury, that could pose major problems if dumped en masse into landfills. However, since the mid-1990s, batteries have been made with less harmful alkaline materials. This means it isn't quite as big a deal to throw batteries in the trash. Still, it's a good idea to recycle what you can rather than leaving things to sit in landfills. There isn't a nationwide battery recycling program in the United States, so your local city or county may have programs in place that make it easier to recycle small batteries that are commonly used in appliances and other household items.Common Household Batteries: Recycle or Trash?Anyone wondering, "how do I recycle batteries" should take a step back and think about what type of batteries they're trying to recycle. Are they rechargeable or non-rechargeable? With small household batteries, that difference is important. Non-rechargeable batteries usually don't have much to offer recyclers in terms of reusable materials, so it usually isn't seen as worth the cost and effort to process. That means it's most efficient to put these batteries into trash cans rather than recycling bins, though specific rules on this may vary depending on where you live. The story is different for rechargeable batteries.Recycling Rechargeable BatteriesRechargeable batteries use different materials than non-rechargeable batteries, and that means they can do more harm to the environment if they end up in landfills. Heavy metal materials like lithium, cadmium, lead and nickel can work their way into ecosystems if they are allowed to leach into landfills. If you have rechargeable batteries that you no longer need, you should look into recycling options in your area. Some businesses may take them, or you may be able to dispose of them at local hazardous waste disposal events.Why Rechargeable Batteries Are a Better Alternative Though they are more likely to contain harmful materials, rechargeable batteries are still generally the better option for eco-conscious consumers. The fact that you can reuse them over and over means less packaging and less waste going to landfills.Recycling Car BatteriesThough they're large, car batteries are actually one of the easiest types of batteries to recycle. They're among the most recycled items in the United States, and most new car batteries actually include a large quantity of recycled materials. If you're wondering, "where are I recycle used car batteries?" the answer is actually pretty simple. The auto parts store where you buy your replacement battery may take your old battery for free. You could also try to sell old car batteries to a scrap yard for a small profit. MORE FROM QUESTIONSANSWERED.NET We have decided to no longer stock the Baofeng UV-5R. Please consider the TYT TH-UV88 instead. This radio has been approved by the FCC for amateur use only. Type accepted for Part 15B. FCC ID 2AJGM-UV5R Upgraded with an A-V85 antenna! The Baofeng UV-5R is an economical Dual Band UHF/VHF Amateur Radio that's extremely compact. With 128 channel capacity and up to 12 hours of battery life, the UV-5R is a good choice for ham radio operators who need mobility at low cost. The UV-5R features 128 programmable channels with priority channel scanning, dual watch and 1750 Hz call tone. Other features include UHF/VHF Dual Standby, 65-108MHz FM radio, Ani code, DTMF code, Dual display switch and CTCSS manual input. The UV-5R also features built-in VOX (Voice Operated Transmt) for hands-free operation and a high illumination flashlight. The Baofeng UV 5R has up to 4W of power and is powered by 1800mAh Li-Ion battery pack for up to 12 hours of operation. A battery on the feature helps conserve power with a rechargeable Li-Ion battery pack, belt clip, removable antenna, C-ring earpiece with in-line PTT microphone, drop-in battery charger, AC adapter, wrist strap, owner's manual and a one year manufacturer warranty from Baofeng. For your convenience, an optional USB programming cable is available to program the Baofeng UV-5R from a computer. NOTE: Programming software is available for download from the Downloads tab above. (204.1g)Antenna connector type: SMA Male (Standard) Extremely impressed! review by Peter on 10/12/2019 Needed these radios in 2 days for an airsoft event, Amazon was back ordered. Had pay a few dollars more here plus the shipping but got the radios in time. Great radios! We were inside building with thick concrete walls and metal bars...it was the Old Joliet Prison from the movie Blues Brothers and there were no dead areas...radios were solid. Suggest using YouTube to figure out how to program and setup, but the radios are great. If in a pinch I'd buy them again from here, but BaoFeng has a store directly on Amazon for less and free shipping. Great radio review by Joe on 5/26/2019 Great radio, easy to set up, easy to use. Can't beat the price. Haven't had it to long, work or so, we'll see how it holds up. But for right now, everything works great. FOR THE MONEY YOU CAN'T BEAT THEM review by BUDDY / MC NEAL NEIGHBORHOOD WATCH on 3/23/2019 WE HAVE 19 OF THESE RADIOS IN SERVICE AND 4 IN RESERVE ALL BOUGHT FROM THESE PEOPLE AND WE WILL BUY MORE AS WE NEED THEM. THESE PEOPLE ARE GREAT TO DEAL WITH. FOR THE RADIO AND THE NEIGHBORHOOD WATCH AND THE WAY WE USE THESE , YOU CAN'T BEAT THEM. Great Radios review by Paul on 9/23/2018 I have set up a dozen or more of these for VHF-Marine and private frequencies; Only had one dud in the bunch, and 2-way Radios replaced it right away. They are loud, have great battery life, and work better than \$200 radios. Optimistic review by JB on 8/22/2018 I ordered four radios. They came in a reasonable time frame. One radio was not threaded to receive the antenna, one only had 1/4 watt output, and the other two worked good. Taking into consideration the low cost of the radio and the fact that BTWR offered to repair or replace the two faulty units, which is in the process at this time, I am still giving them a positive grade. After all you get what you pay for. I bought 3 review by Jim on 8/18/2018 I'm a ham, so very useful for repeaters both bands. frs and murs frequencies do not require a license so very good for cruising and camping. receiver desensitizes when using another receiver for duplex, otherwise very good reception. dual watch very good. programming good with chirp. have 3 radios. dc adapter, so238 to antenna output , speaker mike all make a nice mobil unit. bought a second one review by jim on 7/16/2018 I am a ham, can use for repeaters. variable offsets meaning more or less then conventional splits. can set separate transmit pl frequencies for more than 1 input to repeater. no receive pl though. use also for FRS- GMRS, and am trying the MURS vhf freq band. so far very pleased with both radios. will replace defective Cobra FRS GMRS radio. no digital call tone. These are Great review by Paul on 5/15/2018 We use these radios mostly for VHF Marine and Weather, but also for private frequencies. They often outperform radios costing six times as much. They program well, and the battery life is terrific. UV5R radio review by Lurch on 2/17/2018 I love the UV5R radios!! UV5R review by Alan on 2/16/2018 Does good Good, plain radio review by Jerry on 2/16/2018 Other than the menus and minimal instructions, and less-standard antenna connection, this is still a workable radio under most conditions. Buying it as part of Buy Two Way Radio's packaged set made even more sense as a particularly inexpensive entry into ham radio. New hams, in particular, should consider the package deal as it includes very useful stuff, especially the extra battery! I BOUGHT 10 OF THESE RADIOS FOR A CERT TEAM. review by BILL W7YY on 5/3/2017 I SET THE HT RADIO UP TO RECEIVE LOCAL POLICE AND FIRE FREQUENCIES.(receive only) I PUT IN A FEW FRS FREQUENCIES FOR THEM TO TRANSMIT ON. PLUS A TOWN VHF FREQUENCY. BEING A HAM RADIO OPERATOR (W7YY) I REMEMBER PAYING OVER \$500.00 FOR A HT THAT ONLY COVERED THE VHF AND UHF HAM BANDS Great little HT review by Rich on 4/27/2017 I also bought the programing cable and the software to make my setup complete and fully operational at top performance, all at a very low total cost, all are top quality and well referred to in the literature, it is the best deal any amateur radio operator can find Most cost-effective amateur radio available review by WV8DOC on 4/26/2017 I have purchased and programmed nearly a dozen of these radios so far. Many of my friends who are not licensed amateurs simply want to use them as emergency service scanners, so I program them with the transmit capability turned off. I have also purchased several of them for first responders who want an alternative to their agency-issued Motorolas. For the price, they are virtually "disposable" so if they get lost or damaged on an emergency call, who cares? Just buy another. GOOD LITTLE RADIOS FOR THE MONEY review by BUDDY on 4/19/2017 WE HAVE BOUGHT 11 OF THESE RADIO AND SO FAR THEY ARE DOING GOOD. THEY ARE DOING JUST WHAT WE WANTED. I would buy this radio again review by Wild Bill on 4/18/2017 I use mine @ home. There is no provision for charging from d.c. Works great. Awesome radio for the price! review by ThisIslandEarth on 12/6/2016 I purchased the Baofeng UV-5R along with the latest firmware confirmation. The radio worker perfectly and handled the latest CHIRP software with no issues. Great Low Cost Radios review by Gary on 9/27/2016 Their size, audio clarity and frequency versatility make these radios perfect for use in group activities where interoperability is required. A great improvement if they could be made "water resistant". I have a total of 4 of these now, with one being the 8 watt model. yes once i get it programmed review by bill on 6/14/2016 chirp sucks cant set freq.s in memn, or tone it cool radio review by SPIKEZ7 on 5/8/2016 FRS/GMRS Radios is cool Great Start 1 review by warhog on 5/5/2016 want to get a Ham license, and decided on this radio as a starter due to the great reviews from other users Economical radio review by bob on 4/3/2016 Should be a good throw in the car and no big loss if stolen radio. The 82, with the dual PTT button seems better A Great Two-Way Radio review by Moore Fun on 4/3/2016 We first used these radios skiing and were impressed with the distances we could travel and still stay in touch. This is an impressive two-way radio for the price. I highly recommend it. I'd buy it again review by Dave on 2/9/2016 Radio goes a long time in between charges, has clear sound on both ends, but a little garbled using earphone microphone. I get some intermittent static some time and not sure why. I wish you could program more than two channels without the computer software, but those are easy to do and change. Great service and product. Thanks much. review by Vic on 1/29/2016 Great little radios for a great price. Never lets me down! review by Mark the ham radio man on 1/29/2016 Great ham radio! This is my second UV-5R but this one has a different firmware in it, updating many things and making the radio even better, the only problem I had was with the drop-in charger, the little plastic part that held it in, one on each side, well, it broke but a little of glue later...it is holding the radio in place again! I would buy this radio again for the same price review by James on 1/28/2016 it is a great radio Love the Radio small for out of the way review by Bob on 12/10/2015 Love the radio using for hunting and other things around the town This is a great entry level HAM radio. review by Tim (W0TES) on 12/8/2015 I have purchased two Baofeng UV-5Rs. As an amateur radio operator, I use these radios with local 2-meter repeaters for emergency exercises. I love their ability to be programmed by computer (with CHIRP software) and quickly set all radios to the same settings. The UV-5R was my first radio, after getting my FCC license. This little handy-talky helped me get started in amateur radio (I built my first antennas, began participating in local 2-meter nets and talking on radio, and started learning about optimizing radio signal propagation). Finally, the price makes these little handy-talkies a great value, so that I can afford to put one in every bug-out-bag. UV-5R failed 42 days after purchase review by Lamar on 8/19/2015 The UV-5R shipped promptly when ordered. Packaging was excellent. Unfortunately, the unit failed 42 days after purchase. 12 days beyond the allowed return period. I have 3 other UV-5Rs purchased just over a year ago. They work flawlessly. The current version do not seem as reliable. The unit purchased from this site was the 3rd attempt (1st here) to get a 4th radio. (The other 2 attempts arrived DOA). 50% review by radioguy on 8/17/2015 recently ordered 4 radios, 1 and 2 were good, #3 had a defected LED screen so some of the characters were not visible, #4 was not able to be programmed, the programming was successful on #1,2,3, but not on the 4th. So out of the 4 radios only two of them came without problems - 50% for the money can't be beat. review by Mobman7326 on 5/4/2015 This little radio does all I expected and more. It came with everything I needed to get my "foot in the door". Had I known about this I would have bought it sooner. Now I need the USB cable and programming materials. Great service! review by DanM on 2/13/2015 I was surprised by how small the radios are. Great Radio. Super Value. review by JDL on 1/13/2015 Unbelievable quality for the money. Great little radio. We all should know that you will not get any "usable" instructions with this radio. You can find really good instructions from a few dedicated people (on the web) that did the work to get the full potential from this radio. Mine also worked 100% with CHIRP software right out of the shoot. Use an original Baufeng cable...and save yourself the grief of trying to get things to work correctly. I also paid the extra \$10 bucks to assure me a working radio with the latest firmware. The radio is so cheap...what's another ten bucks? Delivery was very prompt. Will probably buy another one of these from buytwowayradios.com. For the price...why not? I gave it five stars because at this price we should just know that we may need to do a little "work" to learn the radio. I won't complain about the ridiculously worthless instructions, as some might. Best packaged product ever. review by Woo on 1/12/2014 Purchased two radios. One from this vendor. Both work, but the radio from this vendor is flakey in that it programs ok but in function - if you change channels or switch from sub you must turn the radio off and then on to receive or transmit. Works OK other than that. Unhappy with program review by Doug on 11/24/2014 I gave the radio to a friend who programs radios for the local PD. He was unable to program it as a two way. I bought the program and the cable. I really wanted it for a scanner and a backup two way but now I just use it as a scanner. I could have sent it back but didn't want the hassle. It was a great price so I just use it as a scanner. I am satisfied. Awesome radio! review by jim on 11/10/2014 Best radio you can buy for the money. Comes with an upgraded Antenna. No need to upgrade. great value review by Norda on 3/3/2014 Easy to program and navigate through menus. great value, handy all round radio Great Radio review by Buncoman on 10/20/2013 I've only had the radio for about a week, and it's working as promised. It's a great little, lightweight radio for the price. After downloading some aftermarket instructions, the programming went much faster and easier. I'd recommend this radio to any HAM looking for a small compact radio. Baofeng UV-5R review by Captain on 8/2/2013 Great Radios, simple, inexpensive, reliable, battery lasts forever. basic cheap radio review by far rider on 6/24/2013 I am not happy with the way it programs not very user friendly Baofeng up date review by far rider on 5/17/2013 The Baofeng portable is very a ruggedly built portable. it has great reception and seems to be able to handle what ever is thrown at it. I use one along with others and they keep on working well in all kind of conditions. I use them on the trail when i am out riding and that is dusty hot rainy conditions. the audio is very good to excellent, then range is surprising good from such a small package. I own several of them and they all are working just fine. I do find that the battery doesnt quit last as long as advertised but you can work around that. other wise it is a big bang for the buck.. nothing better for the price review by Radio Guy 157 on 4/28/2013 Let's face it. A radio like this has never been available before for anything less than 100.00 and probably twice the price. It performs as good or better than specs and equal with some japanese radios Durability unknown at this time... time will tell cheap to replace or keep an extra programmed radio as backup programing review by traveler on 4/14/2013 the instructions are vague and hard to understand. It lacks ease of being able to programmed with a simple stroke. It is confusing to have to go back and forth between channels and frequencies to program the radio. Also the antenna connector should be a bnc instead of the one that is on it. And it could do with out the gimmick like the flash light and siren. What does that have to do with a two way radio anyway??
